DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group II in the reply filed on 6/30/2008 is acknowledged. Applicant's election without traverse of the following is also acknowledged: (1) a hydrogel polymer and (2) hemostatic agents. Applicant states in the reply that Claims 61-98 encompass the elected species. Upon consideration, it appears that Claim 62-98 do not encompass the elected species. Claim 62 is directed to an embodiment wherein the body comprises a non-bioabsorbable material. This was not elected in the First Election Requirement. Claim 63-98 depend from Claim 62, either directly or indirectly. Thus, Claims 62-98 do not read on the elected species. Claim 61 reads on the elected species and is currently under examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 61 is rejected under 35 U.S.C. 102(b) as being anticipated by US 20020107437 ('437). '437 discloses a method of marking a biopsy site within a subject's body, comprising depositing an implantable biopsy cavity marking device comprising at least one body comprising a resilient biocompatible material, wherein the marking device is radiopaque and echogenic (see paragraphs 14-28 and 62). The body

may comprise expanding bioabsorbable materials such as collagen (hydrogels) and hemostatic agents (see paragraphs 56-57).
